New Delhi Household Energy Storage Policy

Overview

What is Delhi solar energy policy 2023?

The Delhi Solar Energy Policy 2023 (hereafter, 'the policy') was notified in March 2024 with the goal of increasing installed rooftop solar capacity to 750 MW within the state and accessing utility-scale solar capacity of 3,750 MW from outside the state.

What are the challenges faced by India's energy storage system?

lock reliability. Current storage costs pose challenges. Grid infrastructure expansion must align with renewable capacity additions to prevent congestion. The Government of India set up a 'Round-the-Clock' tender to combine renewable energy with storage, yet implementation is pending. Introducing storage systems at various levels.

What is a research roadmap for decentralised energy storage for India?

objects or that are contained in the analyses conducted. One research roadmap for decentralised energy storage for India has been developed by a Forum comprising prominent Indian research institutes and experts, ensuring the representation of women. Specific thematic sub-groups are created on technology selection, standards, assessment models, barriers.

How has Delhi's solar policy impacted rooftop solar adoption?

At the time of the policy announcement, Delhi's installed rooftop solar capacity stood at 237 MW, which has increased to 313.4 MW, as of March 31, 2025, indicating a 32 per cent increase in a year. This growth reflects the early impact of the policy, which catalysed a surge in rooftop solar adoption across the capital.

Does Delhi need more power generation capacity?

Meeting this growing demand will require a corresponding expansion in power generation capacity. As per the Central Electricity Authority, Delhi has an

installed power generation capacity of 7,884.84 MW as of March 2025.

What is Delhi solar portal?

In November 2024, the Delhi government launched the Delhi Solar Portal, a comprehensive one-stop platform enabling consumers to connect with empanelled rooftop solar vendors, apply for subsidies and incentives, and calculate both their rooftop solar potential and estimated earnings.

New Delhi Household Energy Storage Policy

Energy Storage for Renewable Energy Integration in India

Aug 14, 2025 · Three initiatives, regulations or policies related to decentralised energy storage have been updated or introduced by the relevant agencies at the national or state level.

India's Energy Future: IESA Seeks Stronger Storage Policy ...

Jun 4, 2025 · In a move to fast-track India's energy transition, the India Energy Storage Alliance (IESA) has submitted a comprehensive policy and regulatory framework to the government
