New Energy Supporting Energy Storage Policy Situation

Overview

What is the 'guidance on accelerating the development of new energy storage?

Since April 21, 2021, the National Development and Reform Commission and the National Energy Administration have issued the 'Guidance on Accelerating the Development of New Energy Storage (Draft for Solicitation of Comments)' (referred to as the 'Guidance'), which has given rise to the energy storage industry and even the energy industry.

What is the 'guidance' for the energy storage industry?

Based on the above analysis, as the first comprehensive policy document for the energy storage industry during the '14th Five-Year Plan' period, the 'Guidance' provided reassurance for the development of the industry.

What are the main goals of new energy storage development?

The main goals of new energy storage development include: Full market development by 2030. The guidance covers four aspects: 1) Strengthening planning guidance to encourage the diversification of energy storage; 2) Promoting technological progress to expand the energy storage industry system;.

Why is energy storage important?

Driven by the national strategic goals of carbon peaking and carbon neutrality, energy storage, as an important technology and basic equipment supporting the new power systems, has become an inevitable trend for its large-scale development.

Will energy storage eliminate industrial development?

In the context of the 'dual-carbon' goal and energy transition, the energy storage industry's leapfrog development is the general trend and demand. The follow-up actions will inevitably introduce a series of policies for the

development of energy storage to eliminate industrial development. Faced with 'obstacles' one by one.

What are China's Energy Storage plans?

Tell us and we will take a look. On 15 July, national plans for energy storage were set out by the Chinese National Development and Reform Commission and National Energy Administration. The main goals of new energy storage development include: Full market development by 2030. The guidance covers four aspects:

New Energy Supporting Energy Storage Policy Situation

Policy interpretation: Guidance comprehensively

...

Aug 3, 2021 · Driven by the national strategic goals of carbon peaking and carbon neutrality, energy storage, as an important technology and basic equipment ...

Guiding Opinions on Accelerating the Development of New Energy Storage

Jun 23, 2022 · On 15 July, national plans for energy storage were set out by the Chinese National Development and Reform Commission and National Energy Administration. The main goals of ...

The impact of the government's new energy storage policy ...

Based on the data of listed industrial enterprises in China from 2013 to 2021, this study examines the effects of the

government's NES policy on carbon emissions using a staggered difference ...

Suggestions on Supporting Policies for New Energy Storage ...

Based on the current price mechanism in Guangdong, the energy storage economy of power generation, power grid (independent), user-side was estimated, the current situation and ...

Share or not share, the analysis of energy storage interaction ...

May 1, 2023 · The main difference between the centralized is that decentralized can maximize the energy storage potential in the existing storage resource, under the context of the supporting ...

Navigating the Energy

Storage Landscape: Challenges and ...

May 7, 2025 · After the policy shift, how to effectively incentivize necessary energy storage investments through market-based mechanisms (such as capacity compensation and ...

Analysis and suggestions on new energy storage policy

Finally, combining the actual policies and specific applications, the shortcomings of policy formulation are found, and suggestions are put forward for the current commercialization ...

A critical-analysis on the development of Energy Storage industry ...

Aug 1, 2018 · With the combination of Internet, information technology and energy, energy storage industry plays an important role in the adjustment of energy structure with its abundant ...

Energy storage policy analysis and suggestions

in China

Moreover, it separates energy-storage policies at the national level in China from the aspects of industrial energy storage plans, incentive policies for energy-storage applications in the ...

Analysis and suggestions on new energy storage policy

Finally, combining the actual policies and specific applications, the shortcomings of policy formulation are found, and suggestions are put forward for the current commercialization ...

Analysis of New Energy Storage Development ...

Mar 29, 2023 · Energy storage technology plays a significant role in the pursuit of the high-quality development of the electricity market. Many regions in China ...

Navigating the Energy Storage Landscape: Challenges and ...

May 7, 2025 · We have reason to believe that after this round of profound adjustments and cleansing, China's energy storage industry will become more mature and resilient, ultimately ...

China's new energy storage industry: Challenges and policy ...

While China's new energy storage industry leads in technology and market, the industry is undergoing a critical transition from the research and demonstration phase to large-scale ...

Energy policy regime change and advanced energy storage: ...

Apr 1, 2018 · Employing a multi-level perspective (MLP) approach (Geels et al., 2016), it examines the development of new energy storage technologies as an encounter between existing social, ...

Full text: China's Energy Transition ,

english.scio.gov.cn

Aug 29, 2024 · Full text: China's Energy TransitionIII. Moving Faster to Build a New Energy Supply System China is committed to striking a balance between traditional and new energy ...

Energy Storage Policy Best Practices from New England

Oct 15, 2021 · ABOUT THIS REPORT this report, prepared by Clean energy group (Ceg) and the Clean energy states alliance (Cesa), presents energy storage policy best practices and ...

2025 New Energy Storage: Policy Supports Long

Jun 19, 2025 · As the closing year of the "14th Five-Year Plan", 2025 is a crucial time for testing China's energy transition results and marks the shift of new energy storage technology from ...

New energy storage policy situation

Approximately 16 states have adopted some form of energy storage policy, which broadly fall into the following categories: procurement targets, regulatory adaption, demonstration programs, ...

New Energy Storage Technologies Empower Energy ...

Aug 3, 2025 · KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ('CEC') released the New Energy Storage Technologies Empower ...

China to develop high-quality new energy in new era

May 30, 2022 · To fully engage the ecological protection benefits of new energy, the country will actively promote new energy projects that are good for ecological restoration and improve the ...

Energy storage 2025 new policy subsidy

ANEEL will formulate a new electricity price policy after 2028 depending on the situation, and the reduction of subsidies will benefit the development of energy storage, which will drive the ...

CHINA'S ACCELERATING GROWTH IN NEW TYPE ...

Jun 13, 2024 · The Coverage and Intensity of Policies Continuing to Increase Technological breakthrough and industrial application of new type storage are included in the 2023 energy ...

Application scenarios of energy storage battery products

China releases guideline on strengthening integration of ...

Jan 4, 2024 · The guideline, jointly released by four authorities including the NDRC and the National Energy Administration, aims to give full play to NEVs' important role in ...

Energy storage system policies: Way forward and

opportunities ...

Dec 1, 2020 · ESS policies have been proposed in some countries to support the renewable energy integration and grid stability. These policies are mostly concentrated around battery ...

FLEXIBLE SETTING OF MULTIPLE WORKING MODES

The Economic Influence of Energy Storage Construction ...

Abstract: The increase in the proportion of renewable energy in a new power system requires supporting the construction of energy storage to provide support for a safe and stable power ...
