New Zealand Solar Tiles

Overview

What is a goodwe solar roof tile?

The GoodWe Sunshine Series is an integrated solar roof tile solution designed for pitched rooftops, replacing the need for traditional solar panels and framework. These sleek and aesthetically pleasing tiles maximize rooftop space for enhanced solar production, while their tempered double-glass structure ensures roof safety and durability.

What are solar roof tiles?

When installed, solar roof tiles have a level and integrated appearance, unlike the bulky solar panels that are traditionally mounted on roofs. Solar roof tiles are designed to complement traditional tiles and, although they are still noticeable, they have a sleeker aesthetic.

What is integrated solar roof tile?

An integrated solar roof tile solution for pitched rooftops to replace traditional solar panels and framework for a sleek, aesthetically-pleasing result, maximises your rooftop space for more solar production.

What are the benefits of solar tiles?

These sleek and aesthetically pleasing tiles maximize rooftop space for enhanced solar production, while their tempered double-glass structure ensures roof safety and durability. With improved roof ventilation, heat dissipation, and a quick installation process, the Sunshine tiles boost the efficiency of solar power generation.

When were solar roof tiles invented?

The first commercial solar roof tiles were introduced in America in 2005. Today, there are a number of companies currently producing and supplying solar roof tiles in Australia. One notable design is the Monier SolarTile – a sleek, modular solar tile that is used in place of conventional tiles.

Do solar roof tiles degrade?

Solar Roof will be available in a variety of designs, including Smooth and Textured (available this year) and Tuscan and Slate (available early 2018). Made with tempered glass, Solar Roof tiles are more than three times stronger than standard roofing tiles, yet half the weight. They do not degrade over time like asphalt or concrete.
