New Zealand communication base station EMS closed

Overview

How long will New Zealand's emergency services communications network last?

Estimates are that the radio communications network currently used by New Zealand's emergency services frontline responders won't last past next year. "Over the past 20 years, the requirement for a refresh of the communications technology and infrastructure has been deferred resulting in a material infrastructure deficit.

What will New Zealand's new digital communications network mean for emergency service workers?

A new digital communications network for emergency service workers will roll out from next year, marking the most significant advance in New Zealand's public safety communications in decades, Police Minister, Chris Hipkins, announced today.

What is the New Zealand Public Safety Network?

The Public Safety Network is the new communications service for New Zealand's frontline emergency services responders being rolled-out from mid-2023. Fire and Emergency, Police, Hato Hone St John and Wellington Free Ambulance will be the network's first users and there is scope for other government agencies to join in the future.

Will New Zealand's emergency services rollout last past 2022?

An earlier briefing in December 2022 mentioned risks to the rollout because of the availability of spectrum (radio frequency) and resourcing challenges. Estimates are that the radio communications network currently used by New Zealand's emergency services frontline responders won't last past next year.

How will land mobile radio work in New Zealand?

"Reliable, secure-modern communications are vital to frontline responders.

The new Land Mobile Radio network will help coordinate these services, for the safety, wellbeing and prosperity of all New Zealanders.” The network will be fully encrypted, meaning only emergency services personnel can access transmissions.

What is New Zealand's new mobile radio network?

The network is made up of three main solutions: Cellular, Personal Alerting, and Land Mobile Radio. The latter is the core of the new network, a new land mobile radio service, which was supposed to already be up and running in Canterbury, with Wellington soon to be completed. Tasman was supposed to then follow in September.
