New photovoltaic panel prices in Antwerp Belgium

Overview

A complete solar panel installation typically costs an average of 3 000 to 5 700 euros, including installation costs and excluding VAT. Can you install solar panels on a roof in Belgium?

Installing solar panels on your roof is a (very) cost-effective operation. In Belgium, there are a number of subsidies to help cover the cost of installing solar panels. You can also choose the model of the self-consumption of energy produced by panels, which is also very advantageous.

How does Belgium support solar panels?

Belgium encourages the use of solar energy by offering various forms of financial support. This support makes the installation of solar panels more affordable for many people. Each Belgian region (Flanders, Wallonia and Brussels) offers money to help pay for the installation of solar panels. The amount varies depending on where you live.

Does Belgium pay for solar panels?

Each Belgian region (Flanders, Wallonia and Brussels) offers money to help pay for the installation of solar panels. The amount varies depending on where you live. Go to an online simulation to find out more. In Wallonia, for example, this aid can cover a large part of the installation costs.

How much do solar panels cost?

The price of solar panels has dropped significantly in recent years. In addition, you can receive a subsidy from the government for photovoltaic panels. The average solar panel price is around €1.26 per watt peak (Wp), although the exact price depends on a number of criteria:.

Can solar panels be installed in Brussels?

In Brussels, additional regulations are added: the solar panels can not be visible from a public space, and they do not protrude more than 30cm off the

roof. For the installation of solar panels on the ground, on a protected building or in other regulated cases, you will have to contact your municipality.

Are solar panels self-consumption a good idea in Belgium?

In Belgium, many people are opting for self-consumption for their solar panels. Here's what it means and what the advantages are: You use the electricity generated by your panels directly. If you produce too much, you can sell the surplus to the electricity grid. The upside of self-consumption :
