Niamey Photovoltaic Glass Project Construction

Overview

Will a solar PV plant increase Niger's renewable capacity?

The future solar PV plant will increase Niger's installed renewable capacity and reduce its dependence on conventional fuels. Loading.

Will a 30 MWp photovoltaic power plant improve Niger's electricity supply?

FIND IT! Mahaman Moustapha Barké, Niger's Minister of Energy, has announced the commissioning of a 30 MWp photovoltaic solar power plant. The infrastructure, located around ten kilometres from the capital Niamey, was built under the aegis of Nigerien Electricity Company (NIGELEC) with a view to improving the city's electricity supply.

Does Niger need a solar PV plant?

The African country has an electricity access rate of less than 20% and currently meets the majority of its power demand with electricity imports from Nigeria. The future solar PV plant will increase Niger's installed renewable capacity and reduce its dependence on conventional fuels.

What is the largest solar power plant in Niger?

This has been made possible by the commissioning of the Gourou Banda solar power plant, with a capacity of 30 MWp. Equipped with 55,608 solar panels, each with an output of 540 W, this is the largest solar photovoltaic park in operation in Niger.

Where is the Gorou Banda solar photovoltaic plant located?

The Niger government has announced the results of the pre-qualification process for the design, financing, and construction of the Gorou Banda solar photovoltaic plant, located near Niamey. A total of six independent power producers (IPPs) have been selected in the first phase of the tender for this project.

Why is Niger launching a solar energy program?

The program aims to encourage private investments in solar energy development, in order to increase renewable energy in the national electricity network of the partner country, ensuring the rapid execution of the projects. Niger had an installed PV capacity of just around 27 MW at the end of 2020.
