# Outdoor power supply is too heavy to install wheels

## Overview

---

Do outdoor sockets need a high IP rating?

Understandably, it's very important for an external socket to have a high IP rating as it is exposed to the elements all the time. While the minimum IP rating is IP44, it's advisable to have slightly higher, e.g., IP45 or better to withstand the British weather. Where to position an outdoor socket?

.

Do outdoor sockets need a rated IP44 rating?

Any outdoor socket must be rated IP44 or higher to protect it against the weather. But what exactly is an IP rating?

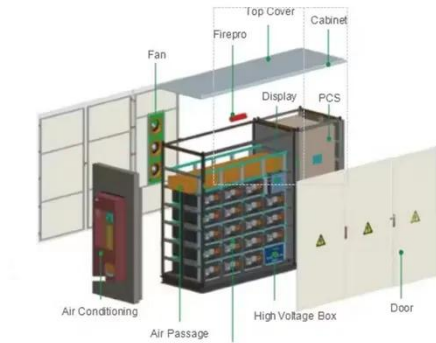

IP stands for Ingress Protection. It relates to the ability of electronic equipment and electrical devices to resist liquid and dust ingress. The two numbers following IP relate to this level of protection.

Can an electrician install an outdoor socket?

Only a qualified and registered electrician can install an outdoor socket. It is not a job that should be carried out as a DIY task, and the installation must comply with BS 7671 18th Edition of the Wiring Regulations.
