

This exploded view diagram illustrates the assembly of a portable electronic device. The components are arranged in a hierarchical manner, showing the relationship between the main housing and its internal parts. At the base is a black rectangular case with a latch and two small white labels. Above this case, several internal components are shown in an exploded state: a yellow rectangular block, a blue rectangular block, a black rectangular block, and a green printed circuit board (PCB) with various electronic components. A black metal frame or support structure is also visible. The topmost component is a black rectangular cover or lid. The diagram uses a clean, white background to highlight the individual parts and their assembly sequence.
