Portable 20V low voltage power supply

Overview

What is a 6 volt power supply?

Power supply has 2 independent out puts that provide constant current, the first is a 6 volt AC (alternating current) output, the second is a 6 Vo. Power Supplies - Compact, Power Supplies Regulated AC/DC 12V - 2 Amp. This power supply is used where typically low currents are required.

What voltage does a DC power supply provide?

Power supply provides two different voltages: 70V and 125 V at 300mA capacity. The output voltage is selected via a rocker switch. The output is av. Regulated DC Power supply Provides three different ranges - 0-50 V, 0-100V and 0-125 V at 300 mA capacity.

What is regulated DC 0-30v / 2 amp?

Power Supplies Regulated DC 0-30V / 2 Amp. This is a very useful unregulated power supply. Voltage is selectable by means of a positive click stop rotary knob on the front panel. DC as wel. This Power supply provides the following independent AC & DC Voltages. The voltage is displayed by means of digital voltmeter mounted on the fr.

What is a mono output power supply?

This Power Supply is a mono-output model. It produces only 70V DC output at 300mA capacity. The output is available on a pair of safety sockets. This is a vey unique model which provides continuously variable AC & DC power supplies independent of each other. DC voltage is available from .

What is dual output regulated DC power supply?

This dual output Regulated DC Power Supply is highly useful for carrying out numerous electronic & electrical experiments. It provides output v. It provides the continuously adjustable DC output from 0-30V DC at 2 Amp. max Current ratings. Capacity which can be used for any general purpose . Outputs AC 6V /

12V 10 Amp.

What is a regulated DC power supply?

This power supply provides seven DC voltages and one AC voltage. The 5V, 8V and -8V are the regulated voltages provided and all other are unregulated. Power Supplies Regulated DC 0-30V / 2 Amp. This is general purpose Regulated DC power supply. It provides the continuously adjustable DC output from 0-30V DC at 2 Amp. max. current ratings.
