Pv breaker isolator for sale in Burundi

Overview

What breaker do I need for a transformer isolating inverter?

For transformer isolating inverters you will need a DC breaker or isolator that is double pole (breaks negative and positive simultaneously) and is rated to break $1.25 \times$ the Short Circuit Current (I_{sc}) rating of the solar PV array AND $1.2 \times$ the Open Circuit voltage (V_{oc}) of the array. For transformerless, see '4' below.

Are dual pole PV breaker/isolators necessary?

The victron circuit diagrams always show dual pole PV Breaker/isolators between panels and MPPT, however, various sources online suggest they are not necessary, and potentially detrimental. My space is severely limited and my panels size quite small and all individually feed their own MPPT. Are they important?
