Reset circuit breaker factory in Azerbaijan

Overview

Where is the main breaker located?

Locate the main breaker near the electric meter if it's not in the panel. The main breaker is often at the very bottom of the breaker panel and labeled. However, in some cases, it may be located in another panel near the electric meter on the outside of your house.

How do you turn off a breaker?

Turn off every breaker one by one. Use your thumb and index finger to flip the top left breaker switch all the way to the "off" side, then work your way down to the switch below it and so forth. Keep going until you have flipped every switch to the "off" position.

How do you turn a breaker switch back on?

Most breaker switches won't allow you to turn them back on until they have been completely shut off. Grip the switch with the thumb and index finger of one hand and flip it all the way to the "off" side. Remember, do not touch the panel with both hands at once. Turn the switch all the way back to the "on" side.
