

## **SolarTech Power Solutions**

# **Romanian outdoor power conversion company**

## Overview

---

How much power does a Romanian solar project use?

With a DC capacity of 5.99 MW, the project integrates seamlessly into the local electricity grid. This solar project, also located in Cluj County, Romania, has an installed capacity of 5 MW. It uses 10 inverters, each with a power of 500 kW, and 20850 solar panels supplied by Astronergy and Chint Solar.

What does Enery do in Romania?

In Romania, Enery plays a key role in the development of the renewable energy sector. The company owns and operates several large-scale solar and wind farms, generating clean energy and supporting national goals for reducing carbon emissions and promoting renewable energy sources.

How many solar panels are there in Romania?

Located in Cluj County, Romania, this solar project has an installed capacity of 4.95 MW. It features 15 inverters, each with a power of 330 kW, ensuring efficient conversion of solar energy into electricity. The system uses 23310 solar panels supplied by Astronergy and Chint Solar to produce clean energy.

Which Romanian solar project uses a micro-hydroelectric system?

Located in Zagra, Bistrița County, Romania, this hydroelectric project has an installed capacity of 0.733 MW and uses a micro-hydroelectric system (MHC) to produce electricity. This solar project in Sârmașag, Sălaj County, Romania, has an installed capacity of 45.6 MW, using 228 inverters of 215 kW each.

How does Enery support the community in Romania?

Enery has taken an important step in supporting the community in Romania by donating and installing photovoltaic systems for both the Corabia Hospital and the Sârmașag School. These initiatives are part of our commitment to contribute to sustainable development and support the well-being of the community.

How many solar panels are installed in Corabia?

The solar project in Corabia, Olt County, Romania, has an installed capacity of 6 MW and 14 inverters of 500 kW each. The system includes 28602 solar panels supplied by REC. The project covers an area of 214,364 m<sup>2</sup> and has a DC capacity of 7.007 MW, ensuring efficient energy production and integration into the local grid.
