

## SolarTech Power Solutions

# Rome Energy Storage Container Procurement Network System

 **TAX FREE**    

## ENERGY STORAGE SYSTEM

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

## Overview

---

How will MACSE change energy storage requirements in Italy?

There are stark differences in energy storage requirements across Italy and MACSE procurement targets will adapt to these zonal needs. Most of the new utility-scale storage capacity catalyzed by MACSE will be needed in Southern Italy and the islands, with 16.8 GWh in the South, 13.6 GWh in Sicily, and 10.4 GWh in Sardinia.

What is Italy's largest energy storage system based on used batteries?

Italy's largest energy storage system based on used batteries for electric vehicles was inaugurated on Tuesday at Rome's Fiumicino airport to help it reduce carbon emissions.

Why did Mase approve Terna's proposal for a new electricity storage capacity?

With Ministerial Decree 10 October 2024, no. 346, therefore, MASE approved Terna proposal for the regulation about the procurement for new electricity storage capacity to be valid for the first auction dedicated to lithium-ion batteries and electrical storage technologies other than lithium-ion batteries and hydroelectric storage.

When did Terna submit a proposal for a new electric storage capacity?

Following such public consultations, pursuant to Article 18, Paragraph 6 of Legislative Decree No. 210 of November 8, 2021, Terna submitted the proposed regulation of the procurement mechanism for new electric storage capacity to MASE, by Note Prot. MASE No. 0144133 of August 2, 2024, for approval.

Why is Italy focusing on advanced storage technology?

In the broader EU landscape, where there's a collective push for 42.5% renewables in energy consumption by 2030, Italy's focus on advanced storage tech sets them apart from EU neighbours still heavily invested in traditional

grid upgrades.

How much storage capacity will Italy need by 2030?

Namely, according to the updated scenario developed by gas company Scam and power grid operator Terna, Italy will need 72 GWh of storage capacity by 2030 to meet the EU's "Fit for 55" package goals. Around 50 GWh of this capacity will be allocated to new utility-scale systems supported by MACSE to complement the growing penetration of renewables.

## Rome Energy Storage Container Procurement Network System

---

### At Rome's airport, an energy storage system using EV ...

Jun 3, 2025 · The largest energy storage system in Italy, based on batteries from electric vehicles, was inaugurated at Rome's Fiumicino Airport on Tuesday to reduce carbon emissions. The ...
