San Diego Solar Street Lights

Overview

The City of San Diego is partnering with GE to upgrade streetlights to reduce energy costs by 60 percent as well as transform them into a connected digital network that can optimize parking and traffic, enhance public safety and track air quality. Does San Diego have streetlights?

We also share responsibility with Caltrans for lights on the freeway off/on ramps that intersect city streets. Currently, there are two types of streetlights in San Diego: Induction lights, which emit white light, and Low-Pressure Sodium (LPS) lights, which emit a monochromatic yellow light.

Who is responsible for streetlights in San Diego?

The Street Division is responsible for all the streetlights in the City of San Diego. The City of San Diego has over 55,000 streetlights in operation. Nine thousand of these lights belong to local community "Lighting Districts," which pay a special assessment fee to support the additional or ornamental lighting in their neighborhoods.

How did San Diego reduce street light energy use?

San Diego upgraded its street lighting with LED fixtures and adaptive controls to measure and control energy use, and worked with the local utility to establish more favorable billing rate structures for efficiency measures. As a result, the City cut street light energy use by more than 50% from 2010 to 2015.

What is solar street lighting?

Solar street lighting refers to street lights that use solar energy for illumination. These systems are particularly suitable for small areas (less than 200 sq ft). Solar street lighting was a promising street lighting option during the first decade of this century and some of these lights are still in operation.

What are the advantages of solar street lights?

Amrut Energy's solar street lights are highly durable and give excellent performance. They are available in various configurations, including Integrated Solar Street Lights, which come with an inbuilt battery and solar panel for easy use. Solar Street Lights are known for their elegant looks and efficient energy usage.

What is smart streetlights?

The Smart Streetlights project began as a cost-savings effort for the City to replace high energy use streetlights with more efficient LED lights. It evolved into deployment of the world's largest smart city sensor platform.
