South America Photovoltaic Glass

Overview

Solar PV glass, which converts solar energy into electricity using solar cells, is gaining traction in Latin America countries due to increased demand for solar PV installations, decreasing PV module prices, and rising rooftop solar installations, particularly in the residential sector. Who owns the South America solar photovoltaic market?

The South America solar photovoltaic market is fragmented. Some of the major players in the market include Enel Green Power S.p.A., Trina Solar Limited, Atlas Renewable Energy, Sonnedix Power Holdings Ltd, and Canadian Solar Inc.

Which segment is the largest market for solar photovoltaic in South America?

Moreover, owing to a large number of upcoming solar PV projects, ground mounted segment is expected largest share in the South America solar photovoltaic market over the forecast period. Brazil is one of the largest markets for renewable energy in South America. Solar was the most competitive energy source among all renewables featured in 2019.

What are the key drivers of South America solar photovoltaic market?

South America solar photovoltaic market is expected to grow at a CAGR of more than 11% during the forecast period. The primary drivers of the market include supportive government policies, rising demand for renewable energy, efforts to reduce GHG emissions, and the declining cost of solar PV systems.

Will Brazil dominate the South America solar PV market?

Overall, Brazil's solar power sector is set to experience a decent growth, and is likely to dominate the South America solar PV market during the forecast period. The South America solar photovoltaic market is fragmented.

Which countries are leading the way in solar energy in South America?

Brazil, Chile, Argentina, and Peru are leading the way in solar energy in South

America, as the climatic conditions in these countries support high irradiation, which is favorable for the generation of solar energy.

Which segment holds the largest share in the solar PV market?

The ground-mounted segment holds the largest share than the rooftop segment in the solar PV market, due to the presence of large-scale solar PV projects in the ground-mounted segment.
