Overview

What is the technical specification for an uninterrupted power supply (UPS)?

In this article, we will learn the technical specification for an uninterrupted power supply (UPS) electrical system used in industries. UPS should be designed and constructed in accordance with IEC 62040. All the components should be mounted in an indoor, floor-mounted, metal enclosed panel with enclosure protection IP 42.

What is the internal control supply of the ups?

The internal control supply of the UPS shall be available provided any of the power sources to the UPS are present. The inverter unit shall control the output of the UPS to maintain synchronism with the bypass voltage during variations in input frequency, within the specified tolerance limits.

What is a voltage independent ups?

- VI (Voltage Independent): this is the UPS in which the variations in the power supply voltage are stabilised by electronic/passive regulation devices within the limits of routine operation .

What are the requirements for the ups to comply with IEC 62040-2?

The UPS shall conform to the electromagnetic emission and immunity levels in IEC 62040-2 for the specified category level. The sound pressure level, measured at a distance of one metre from the UPS in any direction, shall not exceed the specified value, at load conditions ranging from no load to the rated load.

What are the standards governing the characteristics of the ups?

The main standards governing the characteristics of the UPSs are shown below . Lead-acid batteries, in particular VRLAs, are undoubtedly the most common solution in the world of UPSs, in spite of their limited expected life and temperature sensitivity .

What if the AC input power supply is below allowable limits?

Alarm and trip functions shall be provided in accordance with Table 6 as a minimum. In case the AC input power supply falls below allowable limits, the rectifier shall shut down. b When the AC input power supply resumes and remains within allowable limits, the rectifier shall start automatically and no reset is required.
