Sukhumi Power Supply Bureau Energy Storage Battery Subsidy

Overview

Does Japan have a battery subsidy program?

As Japan works to expand battery storage amid growing solar and wind capacity, METI also runs a similar subsidy scheme at the national level. In FY2024, it awarded 34.6 billion yen to 27 projects. Both programs are expected to continue in FY2025.

What is uninterruptible power supply (UPS)?

Uninterruptible power supply (UPS) is the last line of defense to ensure the safe and stable operation of the key equipment of the communication base station. There are many stringent requirements on the security and reliability of BMS, and dauntu energy storage has made full preparations.

How much does Tokyo's FY2024 subsidy cover?

The subsidy covers up to 2 billion yen per project. A total of 12 projects totaling 180MW/595.3MWh was awarded 13 billion yen through Tokyo's FY2024 subsidy for promoting grid-scale battery storage, the metropolitan government's document released in February 2025 shows.

Why are battery storage projects growing in Japan?

The ramp up of battery storage projects in Japan continues apace, aided by growing subsidy avenues and rising volumes on various electricity markets, from spot to balancing to capacity.

Why did METI launch a new 'green' capacity auction system?

It's no surprise that as METI launched an entirely new "green" capacity auction system this year, officials made sure to allocate up to a quarter of its initial 4 GW on offer to battery and other energy storage projects. The need to incentivize more balancing capacity in Japan is strong.

What is battery management system?

Battery management system used in the field of industrial and commercial energy storage.
