Sunshine grid-connected inverter monitoring

Overview

What is a Sunshine grid tie power inverter?

Sunshine Grid Tie Power Inverter is the world's most technologically advanced inverter for use in utility-interactive applications. This manual details the safe installation and operation of the Sunshine Grid Tie Inverter.

Can I repair the Sunshine grid tie inverter?

Do not attempt to repair the Sunshine Grid Tie Inverter, it contains no user-serviceable parts. If it fails, please contact Sunshine customer service to obtain an RMA number and start the replacement process. The status of errors will be displayed with red letters on the grid tie inverter LCD display.

How to monitor an inverter?

The simplest monitoring of an inverter can be performed by reading values on display - display (usually LCD) is part of almost each grid-connected inverter. Most important inverter and grid related parameters are available on LCD screen in such case. Values like PV array power, AC grid power, PV array current are usually available.

What is an on-grid inverter?

On-grid Inverter can convert solar panel DC power into AC power which can directly input to the grid. Its appearance is shown below. These models contain SUN-18K-G05, SUN-20K-G05, SUN-22K-G05, SUN-23K-G05, SUN-25K-G05. The following is collectively referred to as "inverter".

How does a grid tie inverter work?

When the sun shines, the PV panel will produce DC voltage, and the grid tie inverter will change the DC voltage to AC voltage and puts out power to the home grid. When the total power of the electric apparatus that are using in the house is larger than the output power of the inverters, this power from the inverters will be consumed in the house.

Can a 2KW solar inverter be used as a grid tie system?

You can use just one SUN-2000G2 2KW inverter to replace two SUN-1000G2 1KW inverter, connect arround 2KW solar panels to the inverter to get a 2KW "SGPV". You also can install many "SGPV" in parallel to get large power grid tie system. Fig.6 2KW Grid Tie Power System Consist of Two 1KW Grid Tie Power System Stacked
