

SolarTech Power Solutions

Telecommunication power base station ups inverter

Overview

What is telecom power inverter solutions?

Telecom Power Inverter Solutions are offer power for loads from DC to AC. The Telecommunication inverter uses advanced anti-injection noise suppression technology, does not interfere with telecommunication equipments; and has an unattended function.

Can Telecommunication dedicated inverter power supplies be equipped with AC input unit?

The whole series of telecommunication dedicated inverter power supplies provided by our company can be equipped with AC input unit according to user needs. When the mains power is normal, the mains power is stabilized and filtered to supply power to the load, which greatly meets various applications.

How many kW does a telecom power supply have?

Telecom power supplies with rectifier (72 kW right, or 90 kW left) and inverter (7.5 kVA) in one system as well as 10" touch display of the MCU 3000 system controller built into the cabinet door.
