Uninterruptible power supply for El Salvador electricity

Overview

What is El Salvador's energy supply?

El Salvador's energy supply primarily comes from fossil fuels, such as oil, gasoline, diesel, liquid petroleum gas (LPG), kerosene, and bunker fuel. Natural gas does not play a role in El Salvador's energy supply.

How much electricity does El Salvador produce?

El Salvador has three biomass plants which produce about 109.5 MW of electricity. Central El Salvador receives high levels of solar radiation that are conducive to solar generation. Most of the country's installed solar panels are in government buildings, schools, manufacturing plants, and universities.

What are the major sources of energy in El Salvador?

For energy purposes, volcanoes provide major sources for geothermal power. El Salvador also contains 307 kilometers of Pacific Ocean coastline, four main lakes: Coatepeque, Ilopango, Suchitlan, and Guija, and approximately 350 rivers.

Does El Salvador have a capacity to conduct renewable projects?

El Salvador has the national, political will to conduct renewable projects, as evidenced by the numerous incentives provided, the dire climate risks in the country, and their regional partnerships. While the institutional capacity is still catching up, to say they don't have any capacity would be false.

Should El Salvador prioritize renewables?

Prioritizing renewables is of utmost priority to El Salvador from an energy security basis, as they do not have any domestic oil, gas or coal supply and are dependent on imported fossil fuels from their partners.

What role does natural gas play in El Salvador's energy supply?

Natural gas does not play a role in El Salvador's energy supply. Prioritizing renewables is of utmost priority to El Salvador from an energy security basis, as they do not have any domestic oil, gas or coal supply and are dependent on imported fossil fuels from their partners.
