Uninterruptible power supply for hospitals in Tajikistan

Overview

Does etkho have emergency power supply systems?

At ETKHO we have emergency power supply systems that, in the event of failure of the main power system, begin to work automatically in less than 0.5 seconds, thus avoiding any collateral damage, especially for the safety of patients in hospital centers. What are UPSs for?

Critical and complex situations are experienced daily in hospitals.

Why are uninterruptible power supplies important in the healthcare industry?

Uninterruptible power supplies can be critical to the sustainability of life in the healthcare industry. Medical facilities rely on IT and medical equipment for patient care, and equipment relies on the availability of electrical power systems. This dependence is driven by two power vulnerabilities.

What are uninterruptible power systems (UPS)?

Always, also, without prejudice to the technical teams or the patients. Uninterruptible Power Systems (UPS) are a device thanks to which the power supply can be maintained even when abnormal situations occur.

Do medical institutions need a power protection system?

Power protection systems in medical institutions have higher standards than those for commercial or industrial use. Delta offers a large array of Uninterruptible Power Supplies (UPS) designed to ensure organizations can protect their systems and applications by maintaining a consistent stream of energy, even under extreme circumstances.

Do health centers have uninterrupted power systems?

In short, from ETKHO we recommend without any doubt that every health center or hospital has uninterrupted power systems that guarantee its work in any of its areas, especially in critical hospital areas, and in any type of

circumstance, even in the most critical. Always, also, without prejudice to the technical teams or the patients.

What happens if a hospital power supply fails?

Aside from being a jarring experience for patients, a disruption to the power supply at a hospital can lead to equipment malfunctions, system corruption, hardware damage, and data loss. Power protection systems in medical institutions have higher standards than those for commercial or industrial use.
