## Overview

---

How many new solar farms are there in Victoria?

Six new solar farm projects totalling 623 MW of renewable capacity and four big batteries delivering up to 365 MW and 600 MWh of new energy storage have been given the tick of approval by the Victorian government as it looks to meet its target of powering all its operations with clean energy by 2025.

Who is responsible for solar energy development in Victoria?

Supporting development of well sited, well designed solar energy generation facilities in Victoria. The Minister for Planning is the responsible authority for new planning permit applications of all energy generation facilities that are 1 megawatt or greater.

Which solar projects have been successful in Victoria?

Other successful projects include the 95 MW Derby Solar Project and co-located 85 MW/100 MWh big battery being developed by Sungrow Renewable Energy in the state's central north, and Octopus Investments' 80 MW Fulham Solar Farm and 80 MW/100 MWh DC-coupled battery being developed in eastern Victoria.

How do I view solar energy facilities in Victoria?

Solar energy facilities in Victoria can be viewed on VicPlan: Select the 'Map' tab from the main toolbar and select 'Layer Catalogue'. Expand 'Wind & Solar Farms' and select maps by ticking the check-box alongside each layer, then select 'OK'. The selected layers appear on the map and are listed in the layer control panel to the left of the map.

Why do Victorians use small scale solar?

Many Victorians are using small scale solar systems in their homes. This gives them independence from conventional energy supplies and can reduce energy bills. A feed-in tariff is also provided in certain circumstances. Get support to

put solar on your home at Solar Victoria.

How can Victorians save money on solar panels?

Through solar battery rebates and loans, more than 20,000 solar battery systems have been installed across Victoria. The Government has helped Victorian families slash \$1 billion off the installation of solar panels, energy efficient heat pumps and batteries – saving hundreds of millions off Victorian energy bill.
