Vientiane outdoor power supply BESS

Overview

How to find a suitable Bess power rating in Vietnam's power system?

In order to find the suitable BESS power rating and placement in Vietnam's power system for frequency stability improvement, the frequency response is firstly simulated under various values of BESS power ratings. After that, the simulation for the selected BESS' rating with various placements is conducted.

3.2.2.1.

Where can Bess be placed in a power system?

In terms of the location, BESS can be placed everywhere in the power system to perform the frequency support as long as land and connection plans are available. 4.2. Future Work BESS is the novel unit in Vietnam's power system which has been just proposed in PDP 8. Therefore, the following studies can be conducted for BESS in Vietnam:.

Is battery energy storage systems a new wave in Vietnam?

A New Wave in Vietnam's Energy Sector: Battery Energy Storage Systems (BESS)! Vietnam is at the forefront of a transformative shift towards renewable energy, with Battery Energy Storage Systems (BESS) emerging as a cornerstone technology in ensuring grid stability.

What is Bess & how can it help Vietnam?

Energy Management: BESS can help manage the intermittency of renewable energy sources, ensuring a balanced and stable supply of electricity. Vietnam has 20.1 GW of solar and wind power, and congestion in the electricity transmission grid sometimes lead to waste of electricity.

How much does a Bess system cost in Vietnam?

In 2023, EVN PECC3 estimated that the cost for a 2 MWh BESS system was 360-420 USD/kWh, and that the investment would requires electricity prices in Vietnam above 18 UScent/kWh to be profitable - this is twice the current

levels. However, BESS costs are declining rapidly.

What is the current state of Bess in Vietnam?

The Current State of BESS in Vietnam As of 2024, Vietnam has practically no BESS installed. So far, only private renewable power projects have trialed BESS development, there is nothing at the utility scale. The largest electricity storage project in Vietnam is the Bac Ai Pumped Storage Hydropower Project.
