Wall-mounted energy storage liquid cooling unit

Overview

What is a liquid cooling energy storage system?

The 100kW/230kWh liquid cooling energy storage system adopts an "All-In-One" design concept, with ultra-high integration that combines energy storage batteries, BMS (Battery Management System), PCS (Power Conversion System), fire protection, air conditioning, energy management, and more into a single unit, making it adaptable to various scenarios.

What is a 100kw/230kwh liquid cooling energy storage system?

The 100kW/230kWh liquid cooling energy storage system was independently designed and developed by EVB. It is widely used in the energy storage field with grid-tied and off-grid inverters. High specific heat liquid cooling technology. Modular "All-In-One" integrated single cabinet design.

What is battcool-C series air cooled chiller for energy storage container?

Battcool-C series air cooled chiller for energy storage container is mainly developed for container battery cooling in the energy storage industry. It is suitable for cooling and heating energy storage batteries, as well as other temperature-sensitive equipment.
