What is Tesla's new energy storage plant in China?

The facility, first announced in April 2023, marks Tesla's continued expansion in China, the world's largest electric vehicle and energy storage market. Located in Shanghai's Lingang Free Trade Zone, the plant aims to bolster global energy storage capacity by producing 10,000 Megapacks annually, equivalent to 40 GWh of energy storage.

What is China's new energy storage plant?

Located in Shanghai's Lingang Free Trade Zone, the plant aims to bolster global energy storage capacity by producing 10,000 Megapacks annually, equivalent to 40 GWh of energy storage. These lithium-ion battery units are designed for large-scale commercial and utility projects, helping stabilize power grids and support renewable energy integration.

Where is Tesla's new megafactory?

Their comments came on Tuesday, when Tesla's new Megafactory in Shanghai's Lin-gang Special Area went into operation, with the factory's first Megapack battery system rolling off the production line.

Why is Tesla launching Megapack production in Shanghai?

The launch of Megapack production in Shanghai positions Tesla to capture a larger share of the rapidly growing global energy storage market while strengthening its footprint in China's renewable energy sector.

Where is Tesla building a Megapack battery plant in China?

The project is Tesla's second major facility in Shanghai, following the construction of its Gigafactory in 2019. Tesla China's main Megapack battery cell supplier is CATL, but the company has diversified its supply chain.

What is Tesla's new megafactory in Shanghai?

[Photo/Xinhua] SHANGHAI, Feb. 11 -- U.S. carmaker Tesla's new Megafactory in Shanghai, dedicated to manufacturing its energy-storage batteries, known as Megapacks, launched production on Tuesday, marking a significant expansion of the company's presence in China.
