What is the situation in El Salvador Telecommunication base station inverter

Overview

Does El Salvador have a good internet connection?

El Salvador is lagging behind in the expansion of broadband internet connections. Around 66 percent of all residents have access to the internet. Around 11 percent have their own fast internet connection, which is at least faster than the former ISDN (more than 256 kbit/s).

Why does El Salvador prefer US technology products?

El Salvador's private and public sector prefers U.S. information technology products, which creates opportunities for water metering, smart traffic solutions, smart lighting systems, custom technology solutions, and city monitoring systems.

How many people in El Salvador have Internet?

Values above 100 percent mean that, on average, every inhabitant has more than one connection. El Salvador is lagging behind in the expansion of broadband internet connections. Around 66 percent of all residents have access to the internet.

What are the pillars of the Digital Economy in El Salvador?

The findings are organized by six pillars of the digital economy: The lack of affordable international connectivity constrains digital access in El Salvador, slowing down the pace of digital transformation. The country has almost entirely exhausted its current international capacity, which limits available bandwidth and affordable service.

Does El Salvador have a telecommunications sector?

El Salvador's telecommunications sector is largely governed by an outdated 1997 Telecommunications Act which does not consider recent progress in the digitalization space and hinders effective connectivity expansion. The COVID-19 pandemic has shed light on device and connectivity disparities.

How will digital transformation affect the Salvadoran government?

The digital transformation of government services will require updating, redesigning, and integrating existing digital public platforms, allowing the Salvadoran government to maximize the value of data. - El Salvador ranks 107th out of 193 economies in the United Nations' E-Government Development Index (EGDI) report (2020).
