Credit: Ezra Group A public-private partnership in South Sudan has launched the country's first major solar power plant and Battery Energy Storage System (BESS) in the capital Juba, where it is expected to provide electricity to thousands of homes.

Why is South Sudan struggling to provide electricity to its citizens?

According to a 2024 sciencedirect.com report, South Sudan struggles to provide its citizens access to electricity despite having abundant energy resources, particularly fossil fuels.

How much power can a 20MW solar plant produce in Juba?

The 20MW solar plant can generate sufficient power to supply electricity to up to 16,000 households in Juba, significantly reducing energy costs and bolstering grid reliability, said the project's developer.

Is a battery energy storage system better than a ups?

While BESS offers extensive features, it comes with a higher cost and complexity. UPS systems are more cost-effective for applications with limited power requirements. The initial investment for Battery Energy Storage Systems can be higher than that of a UPS, especially for larger installations.

Should I buy a ups or a Bess?

If you need continuous power for sensitive equipment and cannot tolerate interruptions, a UPS may be the better choice. However, if you aim to store renewable energy and reduce your dependence on the grid, a BESS would be more appropriate.

What is a long-duration power supply?

Long-duration power supply in case of outages. Exploring Uninterruptible Power Supplies: Features and Use Cases Uninterruptible Power Supplies (UPS) are devices that provide emergency power to connected equipment when the main power source fails, is designed to provide immediate, short-term power during a power outage or voltage fluctuation.
