Which companies have energy storage power stations in Greece

Overview

Does Greece have a battery storage pipeline?

Greece has emerged as one of the countries with the largest pipeline of battery storage projects, but as yet there has been little activity on the ground. This is changing as the long-awaited storage subsidy auctions have started, with the first projects being awarded support for both investment and operating costs.

Why does Greece need gas storage?

The need for storage in Greece will accelerate rapidly over the next decade as renewables targets are revised upwards and coal plants are closed. The pivot to gas, a core part of the country's energy strategy just a couple of years ago, has been upended by the disruption to supplies and price volatility caused by Russia's invasion of Ukraine.

Why is Greece launching a battery storage auction?

Initially a response to the COVID 19 pandemic, the focus has pivoted to support Greece's green energy transition. The storage auctions themselves require further approval under EU State aid rules. The pipeline of prospective battery storage projects now approaches 27GW, with over 500 projects granted a storage license.

How many companies have won government support for a battery project?

Seven companies have won government support for 11 standalone battery projects at Greece's second energy storage auction, where 300 MW was offered.

Why is Greece launching a storage auction in 2021?

Funding was first announced in 2021 as part of the National Recovery and Resilience Plan. Initially a response to the COVID 19 pandemic, the focus has pivoted to support Greece's green energy transition. The storage auctions

themselves require further approval under EU State aid rules.

Which energy projects remained below the line?

Two offers remained below the line: Alasia's two projects of 36 MW each and R1 Energy's planned unit of 50 MW. CNI's bid for a facility in Livadia was the lowest: EUR 44,100 per MW per year. The highest, at EUR 49,917 per MW per year, was for Terna's battery array in Thebes. The average was EUR 47,680 per MW per year.

Which companies have energy storage power stations in Greece

Top 10 Renewable Energy Developers in Greece , PF Nexus

Jul 15, 2025 · Greece has drawn a wide range of elite developers and investors to help with its green energy transition as it makes investments in major energy projects. As more wind farms, ...

Greece: 27GW of battery storage projects gear ...

Sep 7, 2023 · While 12 projects won awards in the first tranche of Greece's recent grid-scale energy storage auctions, what of the c.500 totalling nearly 27GW ...
